## Experience

### JUL 2020–PRESENT

Backend Software Developer • Trainee Software Developer • GeoTech Infoservices Pvt. Ltd.

### JAN 2020–JUN 2020

Internship • Intern • GeoTech Infoservices Pvt. Ltd.

### Current Responsibilities:

Currently, I am working on the backend of a Fantasy football app, namely “Real Fantasy Teams” or “RFT”. The idea behind it is to create your fantasy football team.

Backend is powered by **NodeJS** and **MongoDB**. The backend handles all the live feeds during a live match and based on a player’s action points get calculated. For faster API response database is designed with the working dataset concept.

I mostly worked on a new feature addition RFT subscription (with RazorPay & ApplePay), data feed, and player point calculation and I resolved many pre-existing bugs and errors of the system from the root, sometimes I came up with hotfixes as well. I have also written several scripts to make some of the RFT scheduled tasks hassle-free and less error-prone.
